ASTRONAUT

Find out what it takes to become an astronaut! Explore the amazing worlds of inner and outer space, as you experience a rocket launch from an astronaut’s point of view and float around the International Space Station.

The mysterious “M” sends Jack and Annie on an exciting adventure to discover the secrets of the Sun, Moon, planets, space travel and more. Based on the best-selling book series, this entertaining show is fun for all ages, whether you are familiar with the series or not!

This locally-produced program connects the culture, mythology and science of the sacred mountain. From high above sea level, gaze into the night sky - back to the beginning of the universe to witness the breathtaking science taking place on this great peak of Hawai'i Island.

The Cowboy Astronomer

Star tales and Native American legends, constellations and starry facts from a “cowboy astronomer”, whose unique viewpoint and unassuming style make this an entertaining way to learn about astronomy.

Elmo, Big Bird and new friend Hu-Hu Zhu discover that they see the same stars at night, even though Hu Hu is from China. Although the friends live “worlds apart”, they realize we all live under One World, One Sky!

DREAM TO FLY

A fascinating account of aviation from early myths, to Leonardo da Vinci’s contributions, the invention of hot air balloons, and the Wright brothers’ first attempts at flying, up to advances in flight and beyond.

One World, One Sky: Big Bird’s Adventure

Perfect Little Planet follows a family of aliens on their search for the perfect vacation spot in our solar system. They explore each planet, plus comets, asteroids and Pluto. A humorous and entertaining show for all ages.

EARTH, MOON & SUN

A fast-paced, fun-filled show exploring the wonders of lunar phases, eclipses, and daily motion of the sky. Native American stories woven throughout the show presents cultural views of the universe as well as the science behind the phenomena.

Every star has a story. Some are as old as the beginning of time, ending their lives in powerful explosions. New stars are born from vast clouds of gas and dust. Through every phase of their existence, stars recycle and release the energy that fuels the Universe.

KALUOKAHINA

NEw!

Kaluokahina’s colorful inhabitants have always lived in peace...until the volcano erupts, and the spell is broken. Now it’s up to the young sawfish Jake and his pal Shorty to restore the magic. Their only lead: the ancient legend that tells of touching the moon...

Tales of the Maya Skies immerses audiences in the fascinating world of the ancient Mayan people—their culture connected to the Universe through science, art and mythology.

STARGAZING

No clouds or bad weather here! Get updates on current celestial events, such as meteor showers and eclipses, and learn how to identify seasonal constellations. On every 2nd Wednesdays of each month.
